

KEVIN FARINANGO C.

Data Scientist | Big Data Engineer | AI Researcher

@ kfarinango@protonmail.com +593995392292 Remote in david-farinango @Asuskf

ABOUT ME

Data Scientist and PhD Researcher with 5+ years of experience specializing in NLP, Generative AI, and Time Series Analysis applied to Healthcare and Financial Markets. Proven track record delivering scalable, production-ready AI solutions for global industry leaders like Google and BAT. Expert in bridging rigorous academic research with practical data engineering to drive business innovation and decision support systems.

PROFESSIONAL EXPERIENCE

Senior Data Science Consultant (Independent)

Asuskf

- April 2017 – present International Projects (Remote)
- Successfully delivered specialized technical solutions across LATAM and Europe. Selected projects:
 - Cybersecurity (Cuba):** Designed a **graph-based Python** system to identify critical network vulnerabilities and trace attack origins for a major data center.
 - IoT & Computer Vision (Chile):** Engineered a facial recognition system using **OpenCV and Arduino** to control vehicle ignition security with **85% accuracy**.
 - Smart Mobility (France):** Analyzed time-series data (**Spark**) to optimize the strategic placement of electric vehicle charging stations based on influx frequency.
 - Healthcare Research (Mexico):** Applied Wavelet signal processing (**Python + R**) to assist in epidemiological doctoral research.
 - Business Intelligence (Peru & Bolivia):** Developed sentiment analysis tools (**MongoDB**) and **Power BI** trackers to identify IT ticket root causes.

GRAPH SCIENCE & NETWORK ANALYSIS

- Graph Signal Processing (Mexico, 2020):** Applied Graph Wavelet Transform techniques to analyze population data signals for a UNAM doctoral thesis. Developed models to detect complex patterns and noise reduction in non-Euclidean data structures.
- Public Governance & Financial Outlier Detection (Ecuador, 2022):** Engineered a transaction monitoring system using Neo4j to identify financial anomalies. Leveraged centrality metrics and community detection algorithms to uncover anomalous relational patterns and external interference in government processes, focusing on identifying irregular influence networks in market data.
- Cybersecurity Topology & Threat Mapping (Cuba, 2024):** Architected a Neo4j-based graph system to visualize and monitor critical data center networks. Designed real-time tracking of attack vectors to identify compromised servers and evaluate the blast radius of security incidents.

Data Scientist

Finerio

- Febrero 2024 - January 2026 Mexico (Remote)
- Spearheaded the automation and optimization of data processing pipelines using **Python, embeddings**, and mathematical modeling, by developing a high-performance abstraction layer, achieving a **99.86% reduction in processing time and cost**.

EDUCATION

- PhD Candidate in Applied Computing
Universidad Americana de Europa
2023 – present Mexico
Focus: Health data science
- M.Sc. in Big Data & Data Science
UNIR
2021 – 2022 Spain
- M.Sc. in Analysis & Visualization of Massive Data
UNIR en México
2021 – 2022 Mexico
- B.S. in Computer Systems Engineering
Universidad Tecnológica Israel
2015 – 2020 Ecuador

CERTIFICATIONS AWARDS

- Scientific Merit Scholarship**
Universidad Israel
- AI for Medical Diagnosis Scholarship**
MINTEL
- Deep Learning Institute**
NVIDIA

TECHNICAL SKILLS

- AI & Data Science Core** Machine Learning, Deep Learning, NLP, Generative AI, Time Series.
- Big Data & Cloud** Azure, AWS, Spark, Databricks, Docker.
- Programming** Python (Advanced), R, SQL, NoSQL.

CORE COMPETENCIES Technical Leadership, Scientific Dissemination, Agile Methodologies.

LANGUAGES

- Spanish (Native) ●●●●●●
- English (B2) ●●●●●●
- French (A1) ●●●●●●

- Designed and implemented modern, scalable **data lake architectures** on **AWS**, supporting the full data lifecycle and enabling efficient processing of **millions of transactions**.
- Enhanced **prompt engineering** and **Retrieval-Augmented Generation (RAG)** methodologies for **LLM-based agents** using **LangChain** and **LangGraph**, significantly improving **response accuracy** and **contextual relevance**.
- Improved and maintained the company's **knowledge base**, increasing **retrieval efficiency** and accuracy for downstream AI applications.
- Reduced **LLM operational costs** through strategic optimization of **prompt design**, **model selection**, and usage patterns.
- Developed advanced **custom classification models** leveraging **embeddings** and **Mixture of Experts (MoE)** architectures.
- Built and deployed scalable **machine learning solutions** on cloud platforms, including **AWS (SageMaker, Bedrock)** and **Google Cloud Platform (Vertex AI)**.

Data Engineering Consultant

PrediQT

📅 March 2023 - January 2024

📍 Ecuador (Remote)

- Architected robust data pipelines to aggregate information from disparate sources, automating core financial calculations for executive decision-making.
- Developed and deployed predictive mathematical models using **Python** and **R**, improving strategic planning accuracy.

Data Scientist & Data Engineer

Nodel.LLC

📅 March 2022 - January 2023

📍 USA (Remote)

- Key Achievement: Delivered scalable AI & Big Data solutions for Fortune 500 clients, including **Google** and **British American Tobacco (BAT)**, utilizing **GCP** and **Azure** ecosystems.
- Optimized **Spark** and **SQL** queries on Databricks, resulting in significant improvement in processing speed and resource efficiency.
- Implemented advanced **NLP models (BERT, SpaCy, Transfer Learning)** to analyze large-scale unstructured text data. Conducted **R&D on nonlinear AI models**, enhancing internal algorithm efficiency.

ACHIEVEMENTS

International Speaker

📍 Delivered technical talks on Data Science, Bayesian Statistics, and AI across Argentina, Chile, Peru, and Ecuador.

- **Learning Path for Data Science Roles** – Escuela de Datos Vivos (**Argentina, 2022**)
- **Introduction to Bayesian Statistics** – Python Chile (**Chile, 2022**)
- **Text Analysis with Python** – TICEC / CEDIA (**Ecuador, 2021**)
- **Scraping & Data Completion Strategies** – GyeTech Talks (**Ecuador, 2022**)
- **Self-education in Data Science** – Saturdays AI (**Ecuador, 2022**)

Advanced Specializations & Diplomas

Diplomas & Specializations

- Digital Project Management (**City University Miami / Scholarship OEA**)
- Data Architecture Directives (**UNIR México**)
- Massive Data Processing Engineering (**UNIR México**)
- Soft Skills and Management Skills (**UNIR México**)
- Data Analysis and Visualization (**UNIR México**)

Certifications

- PCAP (**OpenEDG Python Institute**)
- Internal auditor integrated systems ISO 9001:2015/ISO 14001:2015/ISO 45001:2018 (**SGS Ecuador**)

- NDG Linux Essentials (Linux Professional Institute (**LPI**))
- NDG Linux Unhatched (Linux Professional Institute (**LPI**))
- Introduction to IoT (Cisco Networking Academy)

Continuous Learning (courses)

Continuous Education: Completed 60+ technical courses with a strong focus on **Health Data Science**, **Neurocomputing**, **Data Governance (DAMA aligned)**, **Mathematics**, and **Advanced Statistics**.
